

ARGOS TOKEN (ARGS)

WHITE PAPER

Introduction

Purpose:

Addressing the critical need for innovative funding solutions in the rapidly evolving field of image recognition technology. Argos Token (ARGS) aims to bridge this gap.

Vision:

Establishing a state-of-the-art image recognition app that leverages AI (YOLO) and blockchain for enhanced accuracy and security.

Market Analysis

Industry Overview:

The global image recognition market is expected to reach \$50 billion by 2025, growing at a CAGR of 15%.

Problem Statement:

Current funding methods in tech development are often limiting and lack transparency and global accessibility.

Target Audience:

Tech investors, AI enthusiasts, and companies in sectors like security, marketing, manufacturing, etc.

The Image Recognition App

Technology Overview:

Using advanced neural networks for real-time image processing with an accuracy rate of 98.5%.

Use Cases:

Applications in security , manufacturing, retail, software development, entertainment, etc.

Development Roadmap:

Beta version in Q4 2023, full launch in Q2 2024, and ongoing updates.

The ERC-20 Token

Tokenomics:

Name and Symbol: Argos Token, ARGS

Legal and Risk Considerations

The regulatory status of cryptographic tokens, digital assets, and blockchain technology is unclear or unsettled in many jurisdictions, participants should conduct their own due diligence and consult legal, financial, and tax experts before making a decision to participate, purchase or use ARGs.

The success of the ARGs and its associated app is not guaranteed. While the team will make every effort to ensure success, there is always the risk of failure.

In the event of loss or loss of utility value, there is no public insurer or private insurance arranged by ARGs to offer recourse to you.
